

I claim:

- Sub A1*
- allow*
- walls are inherently the sides of a door to a restroom*
- 5 1. Apparatus for permitting sanitary egress from a restroom, the restroom including a door having opposite sides, said apparatus comprising:
a dispenser mounted on one of the sides of the door, the dispenser being adapted to contain and dispense a supply of sheets to a user prior to exiting the restroom; and
a disposal container assembly mounted on the door, the disposal container assembly being adapted to receive the supply of sheets upon exiting the restroom.
- 10 2. Apparatus as set forth in claim 1 wherein the disposal container assembly is mounted on the side of the door opposite the dispenser.
- 15 3. Apparatus as set forth in claim 1 wherein the disposal container assembly is mounted on the same side of the door as the dispenser.
- allow*
- 20 4. Apparatus as set forth in claim 3 wherein the disposal container assembly is mounted on the door below the dispenser.
- allow*
- 25 5. Apparatus for permitting sanitary egress through a doorway, said apparatus being adapted to be mounted on a mounting member including opposite sides, said apparatus comprising:
a dispenser assembly adapted to contain and dispense a supply of sheets, said dispenser assembly being mounted on one of the opposite sides of the mounting member, and
a disposal assembly adapted to receive the supply of sheets, said disposal assembly mounted on the side of the mounting member opposite the dispenser assembly.

cont

~~11.~~ Apparatus for permitting sanitary egress from a room having an exit and a mounting member having opposite sides and being located near the exit, the mounting member having extending there through a passage, said apparatus comprising;

5 a housing adapted to be mounted on the mounting member, the housing defining an interior space and having a portion extending into the passage in the mounting member,

a first opening in the housing,

a second opening in the housing, and

10 a member located in the interior space and dividing the interior space into a dispenser portion communicating with the first opening and adapted to contain a supply of sheets and into a container portion communicating with the second opening and adapted to receive the supply of sheets.

15 ~~12.~~ Apparatus as set forth in claim 11 wherein the first opening is on the one side of the opposite sides of the mounting member and the second opening is located on the side of the mounting member opposite the first opening.

20 ~~13.~~ Apparatus as set forth in claim 11 wherein the portion of the housing extending into the passage includes said second opening.
